

# TUMBLLED VALLEY STONE

**TO STAND THE TEST OF TIME**

***RICE***  
**CONCRETE**

**Valley Stone** products have a proven track record of over 40 years, standing the test of time in our tough Maritime climate.

The permanence of stone is legendary... and Tumbled Valley Stone offers you the look and durability of aged, rough hewn granite. Specially designed to withstand the harsh Atlantic climate, Valley Stone has endured year after year, season after season through our cold winters, hot summers, and the salt spray at our coastal communities.

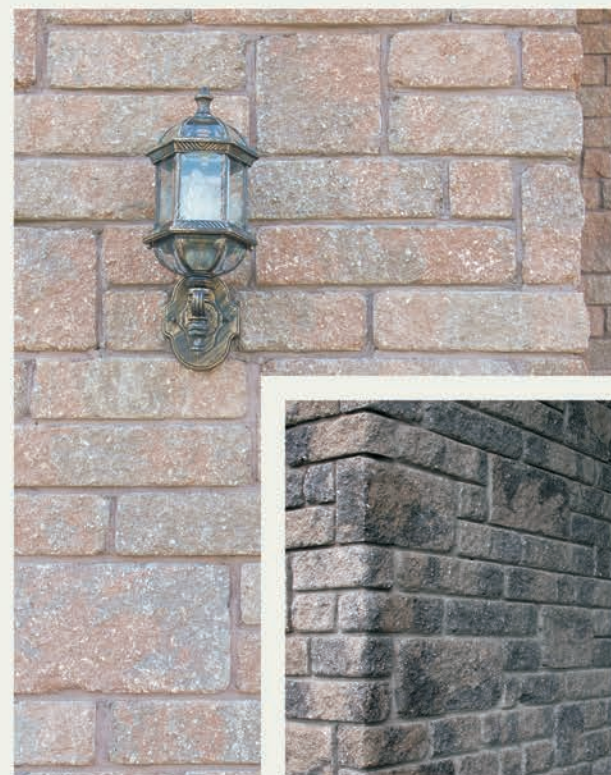

**Masonry** has always been the choice for enduring, natural beauty because of the strength and durability of stone products. Building with masonry offers a number of benefits for property owners including protection, low maintenance, savings and value.

## OTHER BENEFITS

- Fire resistant due to the non-combustible materials.
- Weather resistant exterior walls that will hold up to storms and severe weather, both cold and hot.
- Protection from rot, mold and fungus that can affect traditional building materials.
- Superior soundproofing because masonry reduces noise better than other building materials, resulting in quieter environment.
- Masonry requires considerably less maintenance than other building materials.
- Masonry products play a large role in ecologically responsible, environmentally friendly building methods.
- A masonry home offers a greater resale value than other forms of construction.

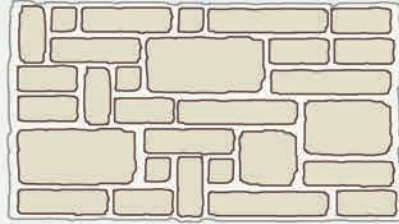

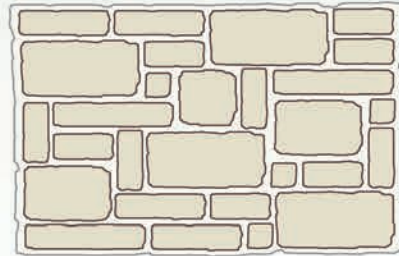

## PROPORTIONS

Tumbled Valley Stone's broad range of sizes lets you customize the appearance of your home - choose the look that is right for your own personal style. And, their modular shape minimizes waste and increases productivity during installation.
